Speed Control

Hot Roller Technology

Reverse Mode

Temperature Control

Cooling Fans

Design & Function

The IKON S series has three key qualities - durability, reliability and capacity. Most systems on the market today only offer one or two of these benefits but we have developed this unique range to give you the expert results you need at an affordable price.

Style

This heavy duty range is compact and fits neatly into any commercial print or copy shop environment or any office where speed is of the essence.

Speed

The IKON-S range features cooling fans and also speed control enabling up to 50% faster output than other similar priced laminators.

Quality & Simplicity

Designed to outlast similar models as this system uses high quality components including metal gears, larger rollers and bigger motors. Each system is easy to use and does not require training.

A1

A1 model also available

IDEAL FOR LAMINATING

- ID and business cards
- signage & notices
- glossy photographs
- posters
- certificates

and many more...

GREAT FOR USE IN

- offices
- local government
- education - schools, colleges and universities

IKON-S series

IKON-S IP-320S / IP-450S / IP-650S / IP-330HS

IKON IP-320S

- laminates from ID to A3
- hot roller technology
- robust all metal construction
- variable speed & temperature control
- suitable for hot foiling & mounting
- anti-jam reverse mode
- power and ready light indicator
- takes pouches up to 500 micron
- no card carrier required.

A3

IKON IP-450S

- laminates from ID to A2
- hot roller technology
- robust all metal construction
- variable speed & temperature control
- suitable for hot foiling & mounting
- anti-jam reverse mode
- power and ready light indicator
- takes pouches up to 500 micron
- no card carrier required.

A2

IKON IP-650S

- laminates from ID to A1
- hot roller technology
- robust all metal construction
- variable speed & temperature control
- suitable for hot foiling & mounting
- anti-jam reverse mode
- power and ready light indicator
- takes pouches up to 500 micron
- no card carrier required.

A1

IKON IP-330-HS

- laminates from ID to A3 using hot roller technology
- robust all metal construction
- variable speed & temperature control
- energy saving sleep mode
- suitable for hot foiling & mounting
- anti-jam reverse mode
- power and ready light indicator
- takes pouches up to 500 micron
- no card carrier required.

A3

IKON IP-330HS
high speed system
with hot roller technology
